

CURRICULUM VITAE

Name: Shiyixin Liang

Affiliation: Qiuzhen College, Tsinghua University

Email: liangsyx21@mails.tsinghua.edu.cn

Address: 30 Shuangqing Rd, Haidian District, Beijing, China, 100084

Research Interest

Geometric Representation Theory, Algebraic Geometry.

Recently, my research focuses on the following topics: Satake equivalences, Coulomb branches (especially Cautis-Williams theory), affine grassmannian slices, etc. I also have a keen interest in topics related to the Langlands program; I'm especially interested in the rich geometric structures behind the Langlands program.

Preprint

A coherent version of geometric Satake equivalence for type A. Preprint, [arXiv:2601.07390](https://arxiv.org/abs/2601.07390)

Education

B.S., Tsinghua University, 2021-2025

- Thesis: A coherent version of geometric Satake equivalence for PGL_n
- Advisor: Prof. Peng Shan

Ph.D. student, Tsinghua University, 2025-present

- Advisor: Prof. Peng Shan

Talk

[Geometric representation theory and automorphic forms](#), Sanya; January 5-9, 2026

Title: "A coherent version of geometric Satake equivalence for type A."

Other Activities

- [Beijing Summer Workshop in Mathematics and Mathematical Physics 2024](#), Integrable Systems and Algebraic Geometry (Dedicated to the memory of Igor Krichever) *Beijing, China*; June 24-July 5, 2024
- [Workshop on Algebra and Representation Theory Held on Oregonian Grounds 2024](#), Coherent-constructible Equivalences in Local Geometric Langlands and Representation Theory *Eugene, the U.S.*, July 22-26, 2024
- [Vertex Operators in Enumerative Geometry](#), *Sanya, China*; December 23-27, 2024
- [Beijing-Shanghai Summer School in Mathematics](#), On the Langlands Program *Shanghai, China*; June 30-July 11, 2025
- [Geometric representation theory and automorphic forms](#), *Sanya, China*; January 5-9, 2026
- [Around the Langlands program](#), Week 1: Winter School on Galois representations and automorphic forms; Week 2: Geometric representation theory in the Langlands program *Marseille, France*; 26 January-6 February, 2026
- [Beijing-Shanghai Summer School in Mathematics](#), Midsummer Skein *Shanghai, China*; June 22-July 3, 2026

I will be in Berkeley from from August 17, 2026 to December 17, 2026 attending [Representation Theory Under the Influence of Quantum Field Theory](#) .
